Subject: Microsoft Settlement

I encourage the Government to give Microsoft a fair and just settlement in the case at hand. I personally feel that Microsoft has made a very great and substantial contribution toward the advancement of the computer industry. I feel like the public has not been disadvantaged by Microsoft's pricing policies. My feeling is that without Microsoft's aggressive effort our computer industry would not have advanced at the tremendous rate that it has. I feel that the charges brought against Microsoft, by the Government, has been unfair and unjust, and has perhaps stunted the future growth in this industry. I request that the Government not penalize Microsoft and not impose any restrictions against them that would reduce their ability to carry out the mission of advancing this technology at the very reasonable prices they have been charging for their services and products
